William Steingartner

## Why ?

Sharing media to 50 screens across the company and you have to update each one manually?

That's just inefficient.

## How it works ?

Sign in, upload a video, select screens. Done.

Need to announce something now? A few clicks and it's everywhere.

## What can it do ?

Upload videos, images, and presentations.  
Group screens together.  
Play different content on different displays.  
Live broadcast when needed.

## And the results ?

Everything in one place.  
Information where you need it.  
Anytime. Always in form.
